DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/15/04 has been entered.
2. The rejection of claim 2 under 35 U.S.C. 102(e) as being anticipated by Donoho et al (WO 01/94566 A2) is withdrawn due to Applicants' arguments that this US PCT does list the US as a "designated state".
3. Claim 3 stands allowed.
4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
5. Applicants' arguments filed 7/23/04 have been fully considered but they are not deemed persuasive.

Art Unit: 1647

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 2 is rejected under 35 U.S.C. 102(e) as being anticipated by Donoho et al

(Publication 20030054513; effective filing date of 1/28/00).

Donoho et al teach an isolated NHP cDNA (SEQ ID NO: 1) that encodes the human Nit2 protein of SEQ ID NO: 1 (e.g., pg. 3 & pgs. 1-2 of the Raw Sequence Listing; as it relates to Donoho's SEQ ID NOs: 1 & 2).
